 Primary Examiner, Art Unit 1634

(Applicant/Applicant's Representative Signature – if appropriate)

Continuation of Substance of Interview including description of the general nature of what was discussed: The examiner indicated that the method claims would be rejoined and suggested using the traditional Markush recitation "selected from the group consisting of" in claims 6, 7, 8. Additionally, the examiner indicated that a number of SEQ ID NOS were identical to each other. They are: 43 and 45; 46 and 34; 47 and 48; and 51-54. The examiner indicated that one of each of the duplicate SEQ ID NOS should be deleted from the claims. It was acknowledged that the duplication arose from the different strains which were isolated and sequenced and indicated in the sequence listing. However, the examiner pointed out the the SEQ ID NO was only a representation of a particular nucleotide sequence, not to other information in the sequence listing, and that deletion of duplicative SEQ ID NOS did not alter the scope of the claims. Applicant's attorney agreed to the changes in the attached Examiner's amendment. .
